Mission Statement

Seattle Parks and Recreation will work with all citizens to be good stewards of our environment, and to provide safe and welcoming opportunities to play, learn, contemplate and build community.

Southwest Community Center Before and After School Care Program Philosophy

Southwest Community Center's philosophy of professional excellence places an emphasis on each child as an individual within a group democratic process. Out-of School Time is an invaluable experience in a child's life — an experience which hopefully inspires a school-ager to greater appreciation of other individuals in a social setting. It is the goal of our programs to meet the needs of parents, while addressing the interests and needs of their children through child-centered, emergent activities. Our staff will work daily to promote social recreation, creative exploration, environmental stewardship and hands-on learning through activities and play. Our weekly activities may include sports; opportunities to increase fine motor and gross motor skills; group games; arts and crafts; field trips; science; cooking; creative expression through drama, arts, and music; literature; opportunities for building social skills and confidence; swimming; exploration of environment; and many opportunities for memories to be made.
